

California Proposition 65

01-MARCH-2019

Proposition 65, officially known as the [Safe Drinking Water and Toxic Enforcement Act of 1986](#), was enacted as a ballot initiative in November 1986. The proposition protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

Proposition 65 requires the state to maintain and update a [list of chemicals known to the state of California to cause cancer or reproductive toxicity](#). This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

Utilizing the supplier data provided, Lanpar Technologies, Inc. can, upon customer request, provide a listing of any Proposition 65 chemicals present in our products. Contact compliance@northerntech.com.

Lanpar Technologies, Inc. relies on data provided from our suppliers to determine if Proposition 65 chemicals are present in our components and raw materials. Based on this data, our products, when used as intended, should not intentionally release any Proposition 65 chemicals. In cases where Lanpar Technologies, Inc. determines our product could expose a consumer in California to a chemical above safe harbor levels, Lanpar Technologies, Inc. will provide an appropriate label.

Due to the wide range of applications our products can be used, if your company intends to use Lanpar Technologies, Inc. component(s) in a product(s) sold or delivered to consumers in California, Lanpar Technologies, Inc. recommends that you take steps to determine whether the warning requirements of California's Proposition 65 apply. Your company is solely responsible for determining whether your consumer product needs to be labeled in compliance with Proposition 65.
